SUMMARY

Backend-focused Software Developer with hands-on experience building scalable web applications using Python, Django, and SQL. Strong foundation in data structures, backend architecture, and relational database design. Proven ability to design role-based systems and real-world business workflows. Seeking Software Engineer opportunities to build reliable, high-impact systems.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, SQL

Backend Frameworks: Django

Frontend Technologies: HTML, CSS, JavaScript

Databases: MySQL, SQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Figma

Core CS Concepts: OOP, Software Engineering Principles

PROJECTS

SkillLoop – Peer-to-Peer Skill Exchange Platform

Ongoing

Python, Django, HTML, CSS, Bootstraps, JavaScript, MySQL

- Designing a web-based platform enabling users to exchange skills with one another instead of paying for courses.
- Architecting a matching system that connects users based on skills they can teach and skills they want to learn.
- Planning role-based functionality for users (profiles, swap requests, session scheduling, ratings and reviews) and admins (account, category, and report management).
- Designing the platform to promote collaborative learning and accessible, community-driven education.

Go Rent – Car Rental Web Platform

2025

Python, Django, JavaScript, MySQL

- Designed and built a full-stack, multi-role car rental platform supporting customers, rental providers, and administrators.
- Implemented secure authentication and role-based access control to enforce user permissions across the system.
- Designed a normalized relational database schema managing users, vehicles, bookings, and administrative workflows.
- Developed booking availability logic and pricing calculations with validation to prevent conflicts and invalid reservations.
- Built an admin approval workflow to verify listings and manage platform operations, improving operational efficiency.
- Optimized database access using Django ORM techniques to reduce query overhead and improve response times.

CERTIFICATIONS

Walmart Global Tech – Advanced Software Engineering Job Simulation (Forage)

Jan 2026

- Completed hands-on tasks in advanced data structures, software architecture, relational database design, and backend problem solving.

AI Fluency: Framework & Foundations – Claude Academy

Sep 2026

- Completed a course covering core frameworks and best practices for effective, responsible use of AI systems in real-world workflows.

EDUCATION

Indira Gandhi National Open University (IGNOU)

2023 – 2026

Bachelor of Computer Applications (BCA)

Relevant Coursework: Data Structures and Algorithms, DBMS, OOP, Software Engineering, Computer Networks

LANGUAGES

English, Malayalam, Hindi
